Printed with vegetable-based ink on
paper that contains a minimum of
50% post-consumer fiber content
processed chlorine free

NOTICE

The U.S. Environmental Protection Agency through its Office of Research and Development funded and managed the research described here under Contract #68-C7-0011, Work Assignment #3-20, to Science Applications International Corporation. It has been subjected to the Agency's peer and administrative review and has been approved for publication as an EPA document. Mention of trade names or commercial products does not constitute endorsement or recommendation for use.

FOREWORD

The U.S. Environmental Protection Agency is charged by Congress with protecting the Nation's land, air, and water resources. Under a mandate of national environmental laws, the Agency strives to formulate and implement actions leading to a compatible balance between human activities and the ability of natural systems to support and nurture life. To meet this mandate, EPA's research program is providing data and technical support for solving environmental problems today and building a science knowledge base necessary to manage our ecological resources wisely, understand how pollutants affect our health, and prevent or reduce environmental risks in the future.

The National Risk Management Research Laboratory (NRMRL) is the Agency's center for investigation of technological and management approaches for preventing and reducing risks from pollution that threaten human health and the environment. The focus of the Laboratory's research program is on methods and their cost-effectiveness for prevention and control of pollution to air, land, water, and subsurface resources; protection of water quality in public water systems; remediation of contaminated sites, sediments and ground water; prevention and control of indoor air pollution; and restoration of ecosystems. NRMRL collaborates with both public and private sector partners to foster technologies that reduce the cost of compliance and to anticipate emerging problems. NRMRL's research provides solutions to environmental problems by: developing and promoting technologies that protect and improve the environment; advancing scientific and engineering information to support regulatory and policy decisions; and providing the technical support and information transfer to ensure implementation of environmental regulations and strategies at the national, state, and community levels.

This publication has been produced as part of the Laboratory's strategic long-term research plan. It is published and made available by EPA's Office of Research and Development to assist the user community and to link researchers with their clients.

E. Timothy Oppelt, Director
National Risk Management Research Laboratory

ACKNOWLEDGMENTS

This *Guide* was prepared under the direction and coordination of Emma Lou George of the U.S. Environmental Protection Agency (US EPA), Office of Research and Development, National Risk Management Research Laboratory, Technology Transfer and Support Division, Technology Transfer Branch, Cincinnati, Ohio.

Science Applications International Corporation (SAIC) compiled and prepared the information used for this *Guide* under the management of Lisa K. Kulujian. The authors were Dr. Robert B. Pojasek, Pojasek & Associates, and Cam Metcalf, Executive Director, Kentucky Pollution Prevention Center. Custom Editorial Productions (CEP) of Cincinnati, Ohio, prepared the final document for publication.

The seeds for this document were planted by a Focus Group comprised of invited pollution prevention practitioners from US EPA, Regional and State programs, industry, and academia. This Focus Group was conducted in Cincinnati, Ohio, in conjunction with the National Pollution Prevention Roundtable in the Spring of 1998. It was further shaped by an Engineering Conference conducted in Crested Butte, Colorado, in the Fall of 1998. The final draft of this *Guide* was distributed to more than two hundred pollution prevention practitioners. The following people (in alphabetical order) spent valuable time reviewing and commenting on this publication, providing significant input that helped the authors in making it a more complete and accurate informational *Guide*:

M. Gavin Adams, Pollution Prevention Program, AL Department of Environmental Management (ADEM)
Gary E. Baker, QEP, Battelle
Martine Dumais, National Office of Pollution Prevention, Environment Canada
Art Gillen, Senior Associate, First Environment, Inc.
Robert Lundquist, MOEA / MnTAP
Sandi Moser, National Office of Pollution Prevention, Environment Canada
Margaret Nover, Pollution Prevention Manager, City of Portland
Lynnann H. Paris, Chief, Technology Transfer Branch, TTSD, NRMRL, ORD, US EPA
Timothy J. Piero, Kentucky Pollution Prevention Center
Pollution Prevention Division, Office of Prevention, Pesticides and Toxic Substances, US EPA
John Shoaff, US EPA, Standards & International Affairs, Office of Prevention, Pesticides and Toxic Substances
Mark Snyder, MOEA / MnTAP
TP3 Staff, Division of Environment and Conservation, TN Department of Environment and Conservation (Cynthia Rohrbach, David Borowski, Karen Grubbs)

Pete and Lynnann H. Paris (Chief, Technology Transfer Branch) provided the scenic picture from Maine that has been used for the cover art of the *Guide* and the companion CD-ROM.

ABSTRACT

This *Pollution Prevention (P2) Guide* provides information to help organizations get P2 programs started or to re-evaluate existing P2 programs. It presents an alternative method for working on P2 projects and four approaches to implementing a P2 program in an organization. This *Guide* was not written to provide a “one-size-fits-all” formula for starting or improving a P2 Program. The intention is to spark some ideas and provide tools that can be used to successfully complete an organization’s P2 mission.

Also, the *Guide* is *not* intended to be an exhaustive review of case studies and company examples. It does not include information on state P2 planning requirements. In order to keep this document a reasonable length, these examples have been cited in the references section, and supplemental information is provided on the CD-ROM that accompanies this *Guide*. There are many U.S. Environmental Protection Agency (EPA) programs that support the practice of P2, including Environmental Accounting Project, Design for Environment, P2 Resource Exchange, Environmentally Preferable Purchasing, Sustainable Industry Project, Performance Track Program, and other initiatives across the Agency. Internet links to these programs and other information are provided on the CD-ROM.

An Organizational Guide to Pollution Prevention is organized into three basic sections:

- | | |
|---|--|
| 1. Basic P2 Concepts and Tools (Chapters 1-4) | Introduction to P2, Getting Started, P2 Program Elements, and P2 Tools |
| 2. P2 Program Implementation Approaches (Chapters 5-8) | Traditional Approach, EMS Approach, Quality Approach, and Finding Your Own Way to Implement P2 |
| 3. Companion CD-ROM | Supporting P2 Information |

The EPA acknowledges the efforts of the principal authors of this *Guide*—Dr. Robert Pojasek (President, Pojasek & Associates) and Mr. Cam Metcalf (Executive Director, Kentucky Pollution Prevention Center). This *Guide* was prepared in fulfillment of Contract Number 68-C7-0011, Work Assignment #3-20, by Science Applications International Corporation, under the sponsorship of the EPA. Ms. Emma Lou George was the EPA Project Officer.

ACRONYMS

ACC = American Chemistry Council
BAT = best available technology
BMP = best management practice
CSI = Common Sense Initiative
DfE = Design for Environment
EHS = environment, health, and safety
EMAS = eco-management and audit scheme
EAP = Environmental Accounting Project
EMP = environmental management program
EMS = environmental management system
EPA = Environmental Protection Agency
EPP = Environmentally Preferable Purchasing
FDA = Food and Drug Administration
ISO = International Organization for Standardization
JIT = just-in-time
MSDS = material safety data sheet
MSWG = Multi-State Working Group
NGO = non-government organization
OSHA = Occupational Safety and Health Administration
P2 = pollution prevention
P2Rx = P2 Resource Exchange
PCB = polychlorinated biphenyl
PSM = process safety management
QA/QC = quality assurance/quality control
SGP = Strategic Goals Program
SOP = standard operating procedure
TQM = total quality management
VOC = volatile organic chemical
WBCSD = World Business Council for Sustainable Development
XL = eXcellence and Leadership

CONTENTS

Executive Summary	1
Chapter 1: Introduction	9
Evolution of Pollution Prevention (P2)	9
Benefits of P2	11
Impediments to P2 Use	13
P2 in Steps	15
Organization of This <i>Guide</i>	18
Chapter 2: Getting Started	21
How to Define P2	21
Sustainable Development	23
Integrating the New P2 Program into Core Business Practices	24
Who Should Implement P2?	26
When Will You Begin?	27
Lessons Learned from Past P2 Programs	27
Dealing with Change	28
Chapter 3: P2 Program Elements	31
P2 Program Planning	31
Core Values	35
Selecting Program Elements	40
Lessons Learned	46
Chapter 4: P2 Tools	49
Using P2 Tools	49
Systems Approach Tools	49
Checklists	65
Lessons Learned	66
Chapter 5: Traditional Approach to P2 Implementation	69
Introduction	69
Establishing a P2 Program	70
Writing the P2 Program Plan	71
P2 Program Implementation	71
Maintaining the P2 Program	73
Combining the Traditional Approach with the Systems Approach	74
Approaches for Very Small Organizations	75
Other Implementation Approaches	77

Chapter 6: EMS Approach to P2 Implementation	79
Introduction	79
Getting Started	80
Environmental Policy, Management Commitment, and Scope of the EMS	83
EMS Planning	85
EMS Implementation	91
EMS Monitoring and Measurement	94
Lessons Learned	96
 Chapter 7: Using a Quality Model to Implement P2	 103
Introduction	103
Seven Quality Model Criteria	104
The 11 Quality Model Guiding Principles	108
Five-step Process to Improve Your P2 Plan	114
Using the Quality Model to Implement P2	120
 Chapter 8: Finding Your Own Way to Implement P2	 123
Introduction	123
Extent of Planning	123
Leadership	126
Setting P2 Goals	128
Focus on Results	128
Information and Analysis	129
Process Management	130
Employee Participation	131
Focus on Interested Parties	132
Guiding Principles	133
P2 Program Elements	134
Now It's Your Turn	135
 Index	 137
